SHOPSMART RETAIL SALES ANALYSIS

BUSINESS REPORT

1. INTRODUCTION

This report presents key findings from the ShopSmart Retail Sales Analysis. The analysis includes examining performance of sales, product categories, regional contributions, behaviour of customers and inventory management to identify business opportunities for business improvement.

2. THREE KEY FINDINGS

i) Beauty is the top performing category, where it generated approximately ₦1.76 billion in revenue, making it the leading category. This shows that there is a strong demand for beauty products by customers.

ii) ShopSmart Lagos recorded the highest store revenue of ₦1.23 billion, making it the best performing branch. This highlights varying store performance and an opportunity to learn from best performing branches.

iii) The highest monthly revenue was generated in December with approximately ₦660.63 million, making it the strongest sales month. This shows that customer buying activity may increase seasonally.

3. THREE BUSINESS RECOMMENDATIONS

i) Invest in Beauty product category by prioritising stock availability and targeted marketing to meet high demand.

ii) To improve performance for branches who did not perform well, management should evaluate management sales strategies, product availability, and customer engagement activities of high performing stores and apply those relevant practices

iii) Strengthening inventory and seasonal planning by monitoring stock against reorder levels and preparing inventory ahead of peak periods like December.

4. RISK IDENTIFIED

Stores with products falling below their reorder levels may experience stockouts, potentially resulting in lose of sales and reducing customer satisfaction.

5. OPPORTUNITY IDENTIFIED

Expansion of the Beauty category, as it has generated high revenue and shown strong market demand. This presents an opportunity for ShopSmart to expand successful product lines, introduce complementary products, and increase overall sales and market share.

6. CONCLUSION

The analysis indicates that ShopSmart can improve its business performance by investing in high-demand products, strengthening underperforming regions and improving inventory planning. Implementing these recommendations could support revenue growth, operational efficiency and customer satisfaction.
